

AFTERMARKET PRODUCT CATALOGUE

Suspension, steering and selected service parts

2026 EDITION / EUROPE & NORTH AFRICA

Parts supply. Clear references.

864 WenAuto references for B2B sourcing enquiries

wenauto.com | infos@wenauto.com

Wenzhou, China

A practical catalogue for your next parts enquiry.

WenAuto supports international distributors, wholesalers and importers with automotive parts sourcing and supply coordination from Wenzhou, China. Use this catalogue to identify a reference, review its listed application and prepare a precise enquiry.

How to read the product records

WenAuto SKU

Each reference has a distinct WenAuto SKU. Left and right references stay separate. Include this SKU together with the OE number in your enquiry.

OEM No. / Cross References

Numbers are reproduced from the reference column of the product data. Some are aftermarket cross references or abbreviated variants. A cross reference is not proof of OE manufacture or vehicle-brand affiliation.

Application and years

Vehicle, year, engine and chassis information is shown only where supplied. Catalogue wording can contain shorthand, incomplete dates or inconsistencies. Confirm the exact vehicle, OE number and specification before ordering.

Photographs and configuration

Images are catalogue references. Paired items may show only one side; the opposite-side substitutions are labeled. Confirm bushings, ball joints, brackets and accessories for the actual order.

Availability and quotation

Prices, MOQ, samples, packaging, lead time and delivery terms are quotation-specific. Catalogue inclusion does not establish stock availability or any certification.

About the range

Ball joints mentioned as part of control-arm assemblies are not standalone products. Drag Link is a catalogue term and may refer to a rear suspension link; confirm its exact function.

Image coverage: 855 references have catalogue photographs; 9 are marked for a clean photograph to be supplied with the enquiry.
